# A new communication tool in the healthcare sector

## Actual status:

MVP, Completed Acceleration, confirmed market need.

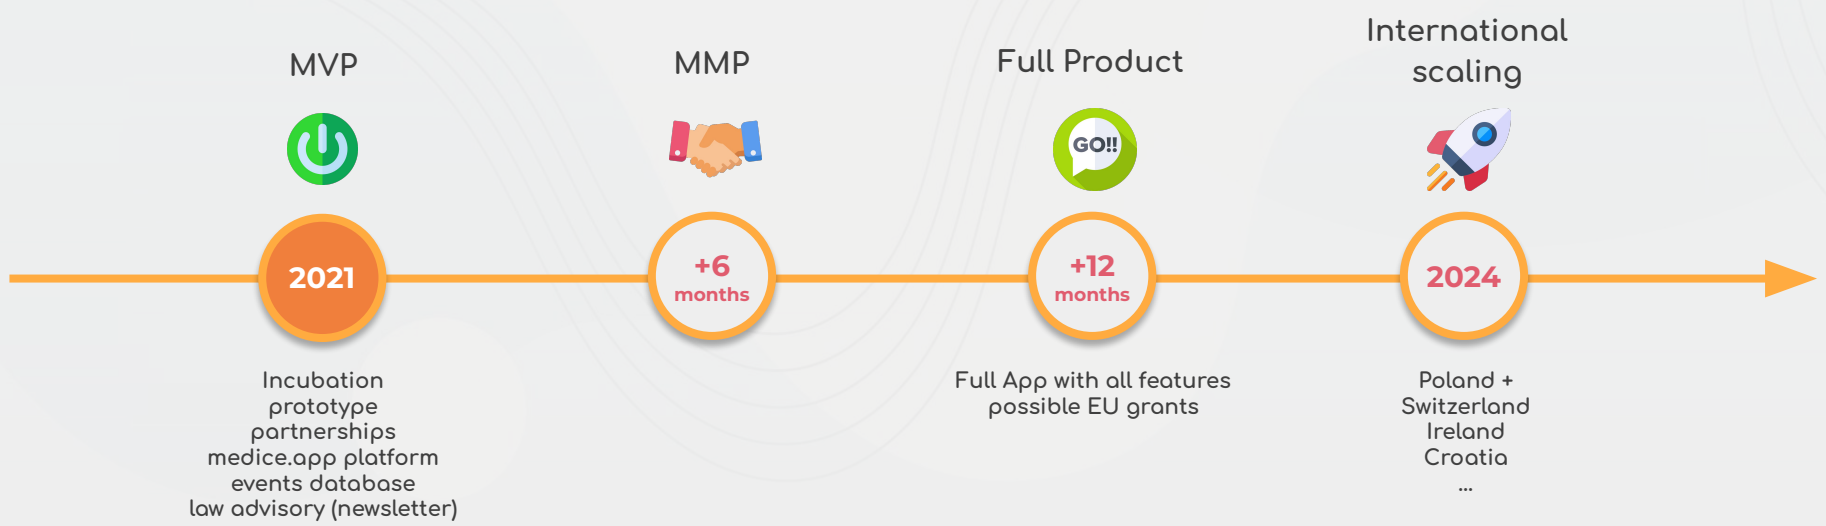

medICE is a software application for consultations and knowledge exchange for healthcare professionals.

- ✓ Legal and uniform communication (currently consultations are taking place via unsecure applications such as Facebook etc.)
- ✓ Saves time (so physicians can follow the information, changes in medicine, law and regulations)
- ✓ Offers individuals a reliable knowledge base (dispersed and archaic media and medical knowledge sources)
- ✓ Supports coordinated care - Value Based Healthcare (VBHC)

Based on survey research H2 2020 -200 respondents and H1 2021 -80 respondents including 80% MD - PhD and professors.
