COMPANY PROFILE

Weco and Welders

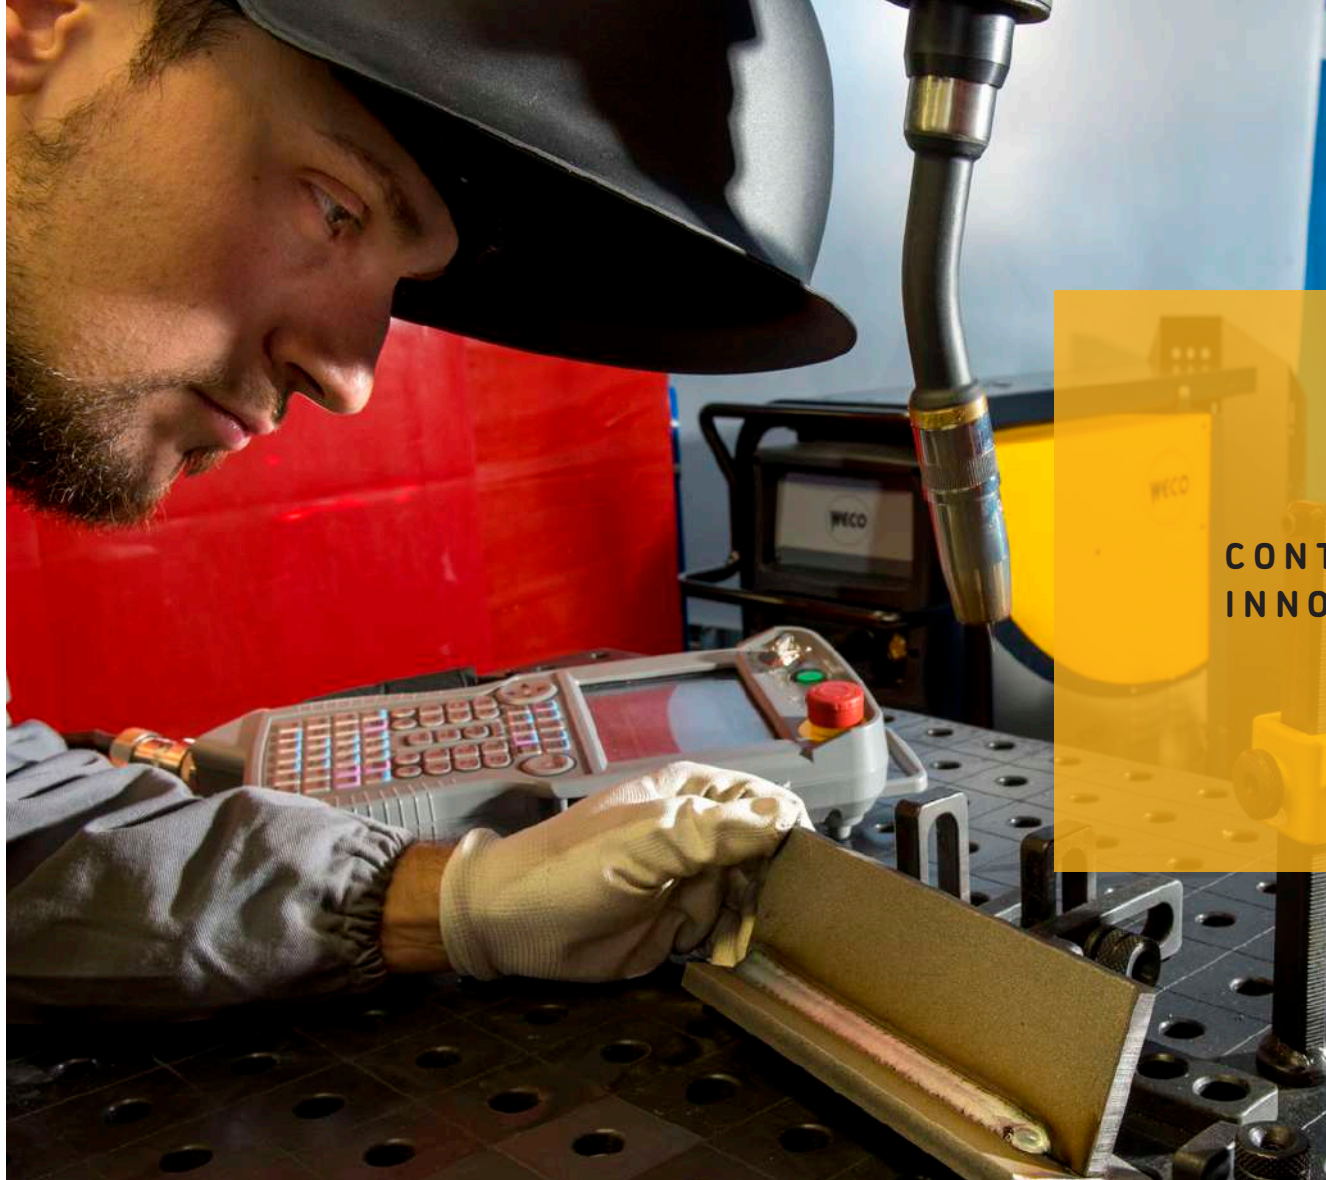

100%
MADE in ITALY

We represent a solid industrial reality since 1997. We produce in the new headquarters in Cittadella (North East Italy) systems and software solutions for the professional welding market and we are able to offer a wide range capable of satisfying every need in TIG, MIG, MMA procedures.

FLEXIBILITY

Our Family Business structure offers advantages of organizational and economic flexibility and makes us active, dynamic and independent.

CONTINUOUS INNOVATION

Every year we invest over 10% of our turnover in the design and development of technologies capable of innovating our products. Behind the quality of our products lives and works a proudly Italian company that makes use of recognized professionals.

A close-up photograph of a welder wearing a red protective suit and mask, working on a metal structure. The welder is holding a welding torch, and bright sparks are visible. The background shows a factory environment with various equipment and structures. A yellow semi-transparent box is overlaid on the left side of the image, containing the word 'RELIABILITY' in black capital letters.

RELIABILITY

Each Weco welding machine is the result of the work of a close-knit team of highly qualified people of which 50% is represented by specialized engineers and technicians. To ensure compliance with the strictest quality standards, we carry out rigorous tests on electronic boards, accurate checks at all stages of assembly and we test all machines before shipping. This is why our equipment guarantee high reliability and allow the operator to weld in absolute safety.

SERVICE

The partnership with the customer is based on trust and listening to their real needs, but also on a highly qualified after-sales service that responds quickly to the different needs of customers located all over the world: our SERVICE managers and our demonstrators offer also a great support to our partners by offering training, participating in Open House and performing on-site operations.

ECO-SUSTAINABILITY

We pay great attention to eco-sustainability and energy saving, in order to reduce the impact of our products and services on the environment as much as possible. With this eco-sustainable perspective, we decided to enter into alternative and renewable energy market by investing in the creation of a new company, DELIOS Srl, which designs and develops solar energy storage and management systems.

SECTORS

Industrial assembly
Maintenance and repair
Shipbuilding
Use in bodywork
Electromechanical assemblies
