About Us

We are passionate about technology. We specialize in the development of **e-commerce platforms** & **web applications**. Our clients appreciate cooperating with us because we are a team of specialists who always deliver projects on time. We support our clients and educate them at every stage of cooperation. We'd love to work with IT companies, e-commerce, marketing agencies & VC.

Over 35+ companies trusted us:

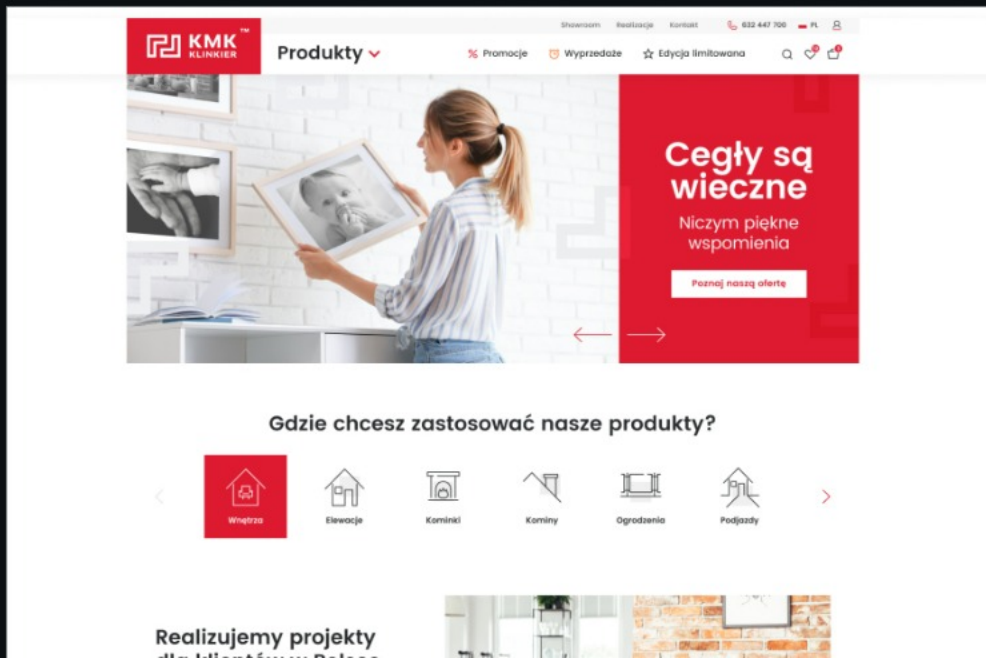

Our mission is to develop custom e-commerce solutions & web applications by using the newest technologies. Thanks to that, our customers meet the expectations of end-clients and achieve better business results.

Our Services

E-commerce platform Development

B2B and B2C E-commerce

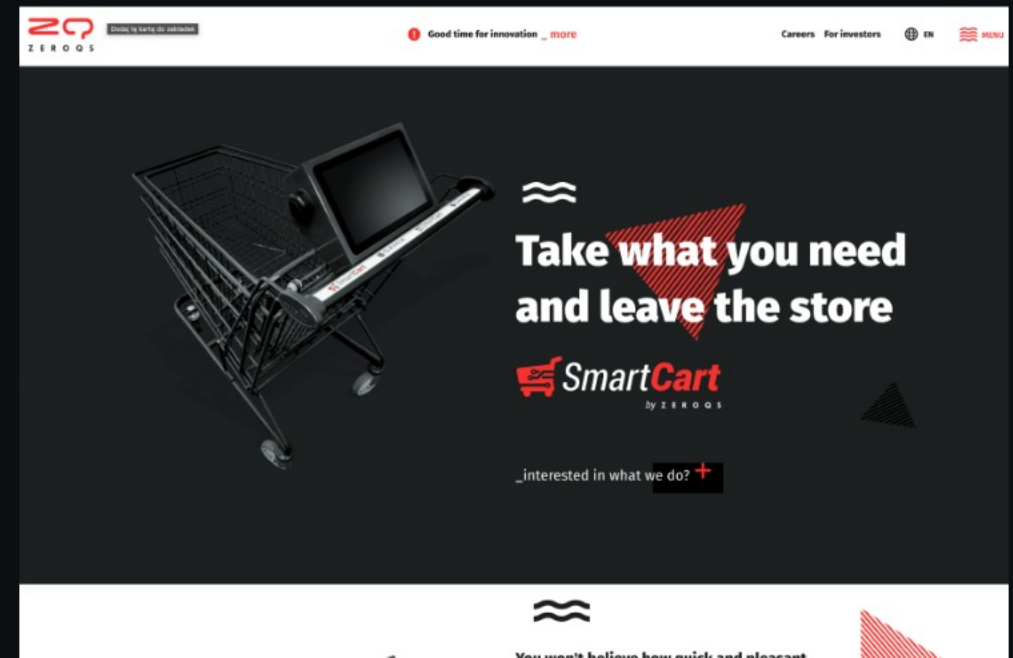

Tech: Symfony, Silius, Nuxt 2

Web app Development

Develop in framework Laravel, Symfony, Vue.js

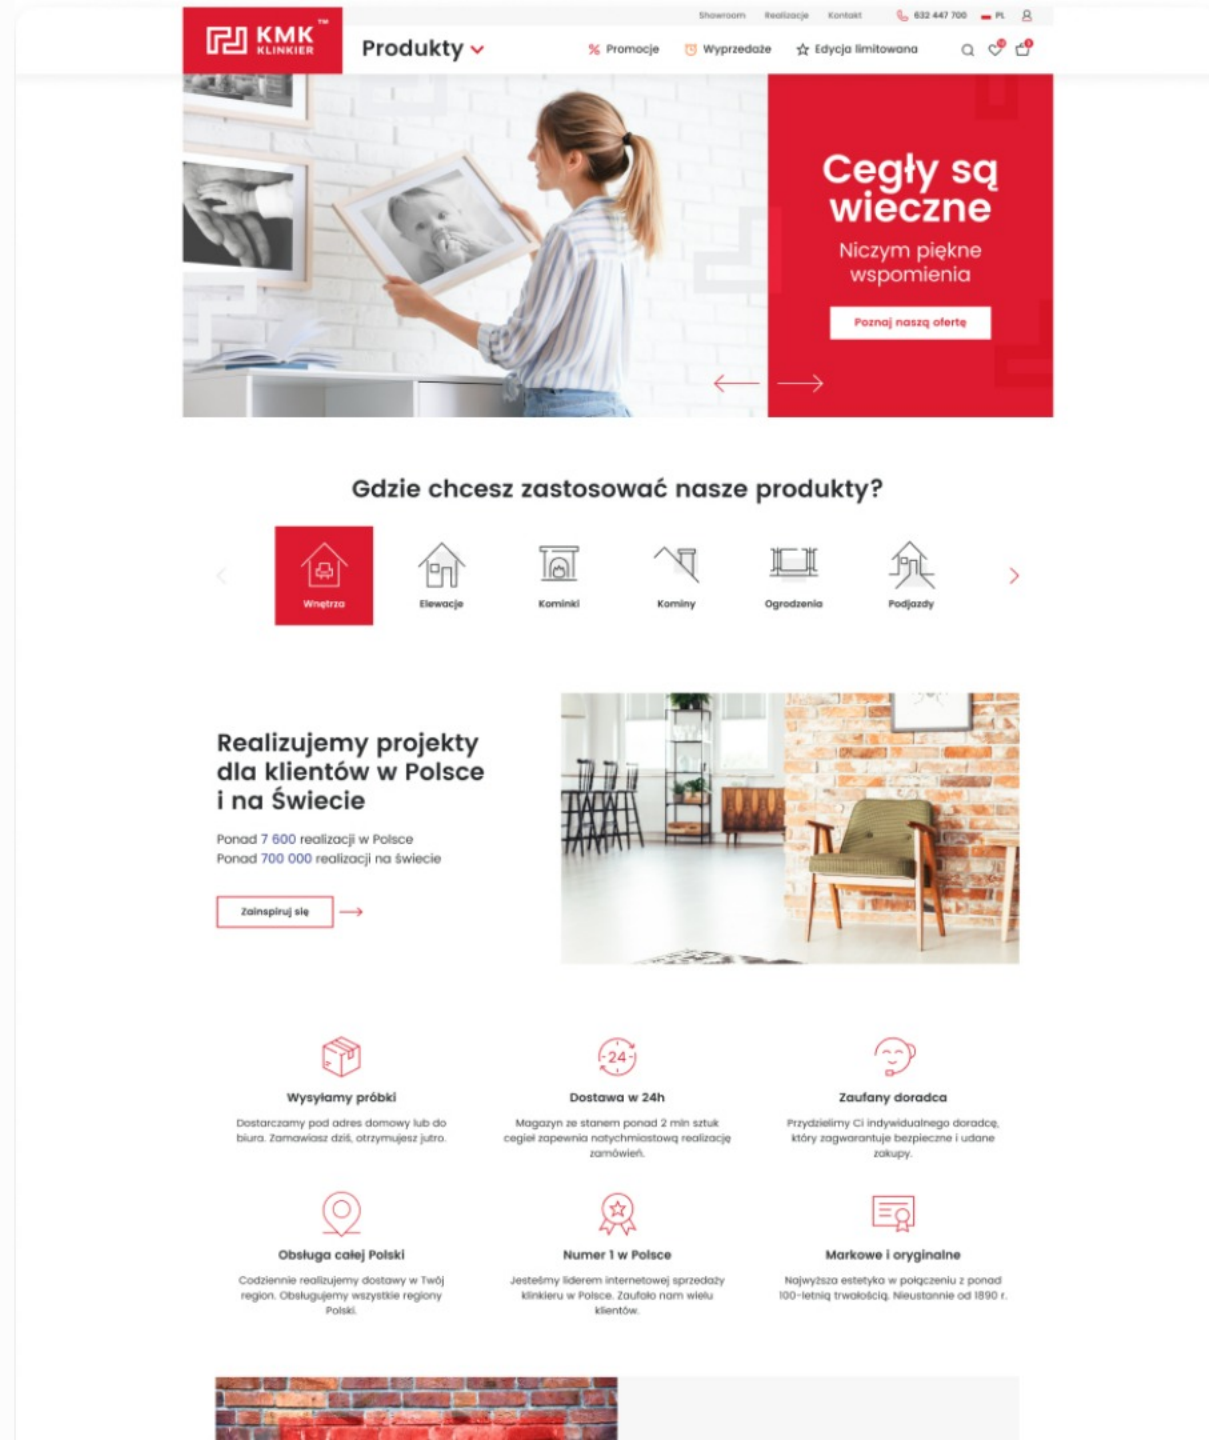

Tech: Vue.js, Vue.js 2

E-commerce platform development

We design and develop modern online shops that meet the needs of our customers. We also do integrations with multiple payment systems and business tools. We use the latest technology that allows us to implement features to improve the user experience. Additionally, we speed up the loading time and optimize the platform administration costs.

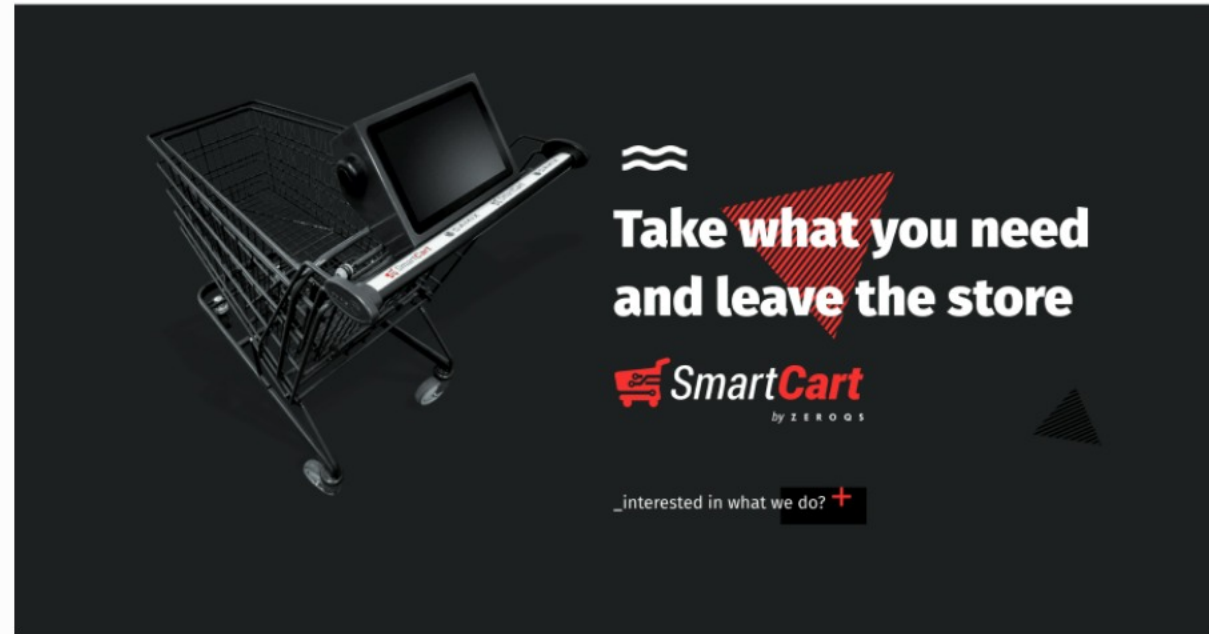

Thanks to this, our clients meet the expectations of end clients, **increase their conversion rates, and improve their sales.**

Web app development

We help to develop, grow and maintain custom web solutions (applications & websites) that guarantee a seamless user experience. Our skilled team of Developers, Designers, Project Managers, Business Analysts and QA Engineers is always tailored to your needs to succeed in each project stage.

Our partnership goes beyond building products, **we support our clients and educate them at every stage of cooperation.**

Modern online shop for GLOBALO

Challenge

- improve an imagery management system to setup a simple slideshow within seconds and add new images to the gallery,
- remove render-blocking scripts,
- improve page load performance.

Client

GLOBALO, Household Appliances

Services

Consulting, Frontend Development, Backend Development

Results

In the project, we used custom fields to create new subpages. The client can easily edit content from WP dashboard. We used libraries such as Swiper or Lightbox to optimize an imagery management system. We also removed render-blocking scripts. It allowed us to improve page speed and now the website displays properly.

Web application for Zeroqs

Challenge

- create a dashboard for managing the self-service cash register for employees,
- design UX and visual representation for the application for tablets,
- analyze and write new front-end documentation.

Client

Zeroqs, Mobile self-service checkouts

Services

Consulting, Product Design, UX Design, Frontend Development, Backend Development, Quality Assurance

Results

The SmartCart mobile self-service checkout consists of a barcode scanner and a touch screen, that enables customers to make purchases. Sales security is ensured by a weight-vision system that detects all errors and fraud attempts in real time. Payment is made at the payment station by card, in cash or via a dedicated mobile application.

FAQ

1. Do you consent to the conclusion of the NDA agreement?

Yes, we sign an NDA (Non-Disclosure Agreement) at the customer's request. We can do this at any stage of the process - it is entirely up to you.

2. Am I the owner of the ownership and the code of my project?

Yes, we always transfer copyrights after the settlement of a given stage of work for the ordered project.

3. Where is your development team located?

Our team works remotely in a distributed system throughout Poland. Thanks to a transparent cooperation we have access to the best programmers. The main seat of the company is in Rzeszów, yet there are no communication barriers for us and visiting the client, also outside our country is not a problem.

4. How do you manage communication in different time zones?

We are a 100% office team, so working with a partner from anywhere in the world, we have a maximum of 2 time zones to coordinate. We have experience in working with clients from all over the world and we are able to effectively cooperate in many time zones. We also have our business partners and project managers employed in the United States, Germany and Great Britain.

After preliminary agreements regarding the conclusion of cooperation, we agree the times of meetings that are convenient for both parties. We communicate with you on Zoho via a channel dedicated to the project, where you can always see all important discussions about your product and you also receive from us to preview the work of (Clickup, zoho, asana..., and the like) where you can also interact while watching the effects of work.

FAQ

5. How do you settle with your customers?

We work based on T&M or Fixed Price divided into stages of work. We adapt to the expectations of our client.

In the T&M model, you pay for the actual work time spent by the team on developing specific tasks. You are responsible for the scope of the project and you set the priorities for the development team, the increase in work is measured by the selected tool with which we can integrate the Clickup system on which we work on a daily basis, including: Chrome plug, toggl, harvest, lockify, hubstaff, everhour, timedocker, timeneye, timely.

In the Fixed Price model, we divide the project into rigid stages, followed by the settlement. The division into stages of works is a compromise between the appropriate code increment according to the approximate date and liquidity for the development team.

6. How big is your team?

We are a 100% office remote team consisting of over 27 talented professionals: Frontend Developers: React.js, Vue.js, Backend developers; Laravel, Symfony, UI designers, UX specialists, manual and automatic testers, Devops and project managers.

7. Can the code be transferred to another team?

Yes. We create project documentation, we store the code in a repository on Github. The one that belongs to us is very clear and well documented, which makes it easy to transfer the project to another team.
