

BREAKDOWN OF

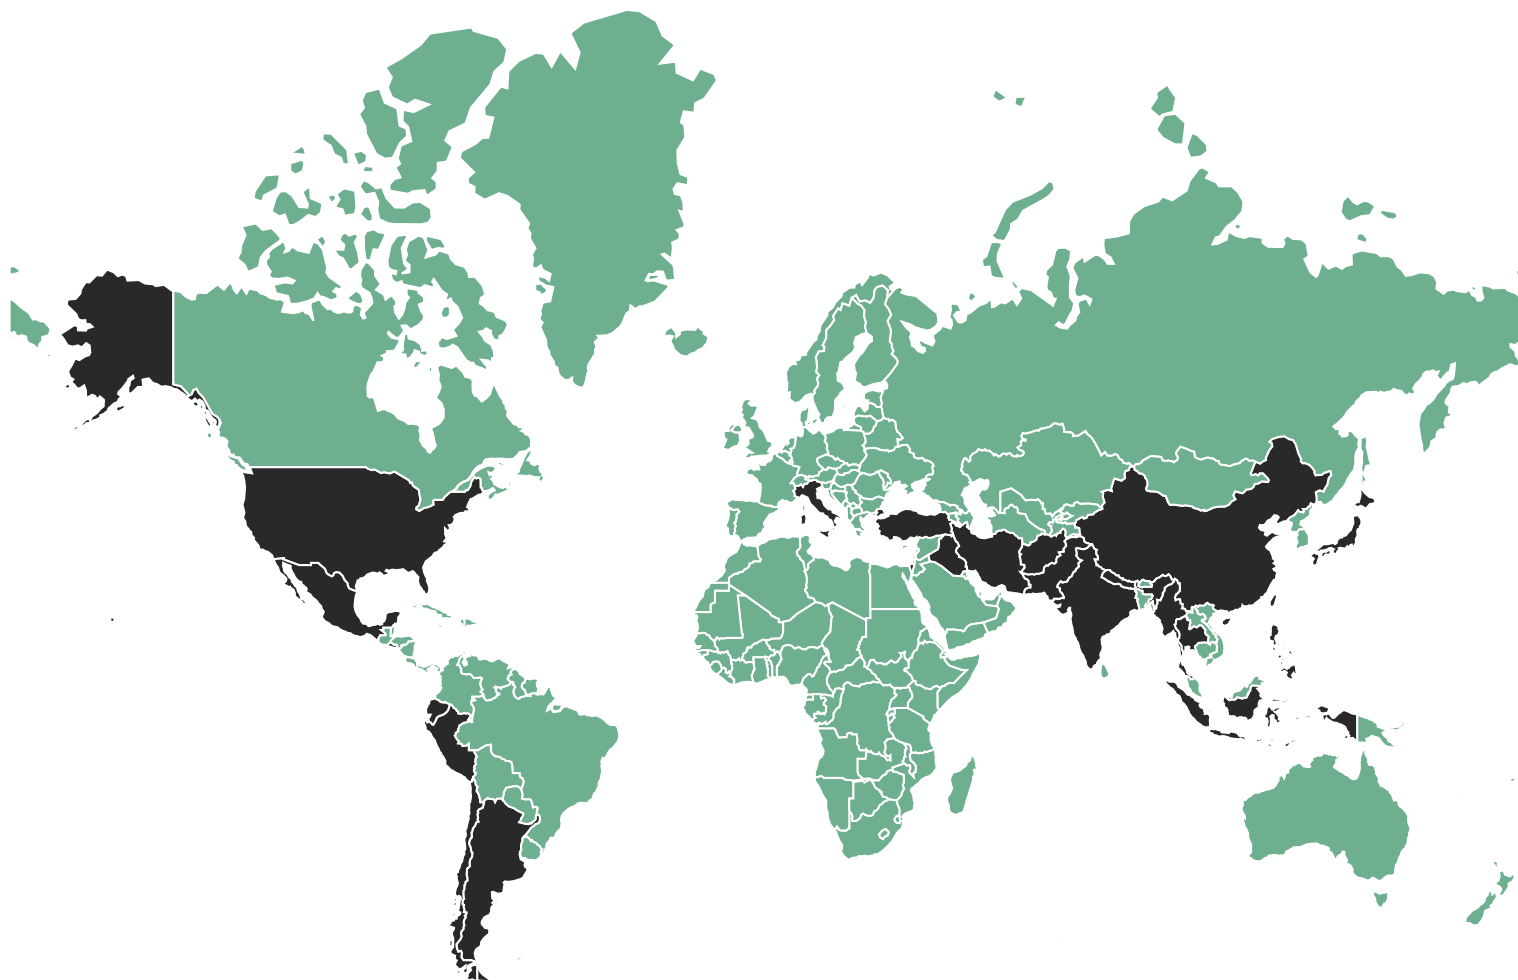

AstroTectonic

Earthquake AI avoidance
and prediction system

www.astrotectonic.com

Today, one-third of the global population lives in active seismic areas. In the United States alone, 143 million Americans are exposed to earthquakes.

HARDWARE

Dedicated Cosmic Rays detectors. Creating global Cosmic Rays data network.

Versions:

- educational
- advanced for earthquake preparedness

SOFTWARE

Web tool cross-correlating and analyzing data using machine learning algorithms.

For end-user: powerful notification tool.

MACHINE LEARNING

System based on multimodal neural networks dedicated to predicting earthquakes by implementing several independent measurements as input
