

Micronose

Allergy affects up to 30% of the population.
Anti-allergy drugs cause side effects and they do not
always work.

There is no natural alternative for routinely used drugs.

Micronose is a first natural and effective therapy of allergy.

Micronose is a new generation of intranasally administrated probiotics.

Micronose has strong scientific background with 10 years of studies and raised 2 mln EUR in scientific grants.

market of anti-allergic drugs

60 bln USD

300 mld USD

business model

Our therapeutic will be offered in e-shop, pharmacies and shops with eco- and natural products for around 20 euro.
