

Eiberger Verfahrenstechnik GmbH

GIGANT

the extraordinary

For degreasing gigantic workpieces or throughputs.
Available in all sizes for your individual requirements.

GIGANT stands for:

- Especially for **heavy and/or large-volume parts** (e.g. **engines, steel or cast iron parts, hardened goods**), which get degreased under atmospheric conditions
- **Variable combination** of spraying, vapour processes and optionally immersion, supported with basket movement and pressure flooding for effective parts cleaning and degreasing
- **Variable programm set-up** within the framework of the selected system configuration, in order to achieve the best possible cleaning results matched to your complex part properties
- **User-friendly operation** of the system through a simple and multilingual user interface

Cleaning procedure depending on configuration:

- Spray cleaning with distillate/filtrate
- Immersion cleaning
- Immersion rinsing
- Ultrasonic
- Basket movement
- Vapour degreasing
- Preservation
- Hot-air drying
- *CE-compliant*
- *VOC-compliant*
- *DIN EN 12921*

*Made
to measure
and need!*

GIGANT-Top-Loader

Standard configuration:

- Safety collection tray made of VA with WHG certificate
- Working chamber with chamber lighting
- Regenerative activated carbon module
- Measurement instruments for monitoring the solvent concentration in accordance with the VOC regulations
- Control system: PLC (SIEMENS S7 TIA portal) and Comfort-Touch. Panel 9" (SIEMENS)
- Remote diagnostics module

Applicable solvents:

- Perchlorethylene (PER)
- Dichlormethane (DCM)
