solution.

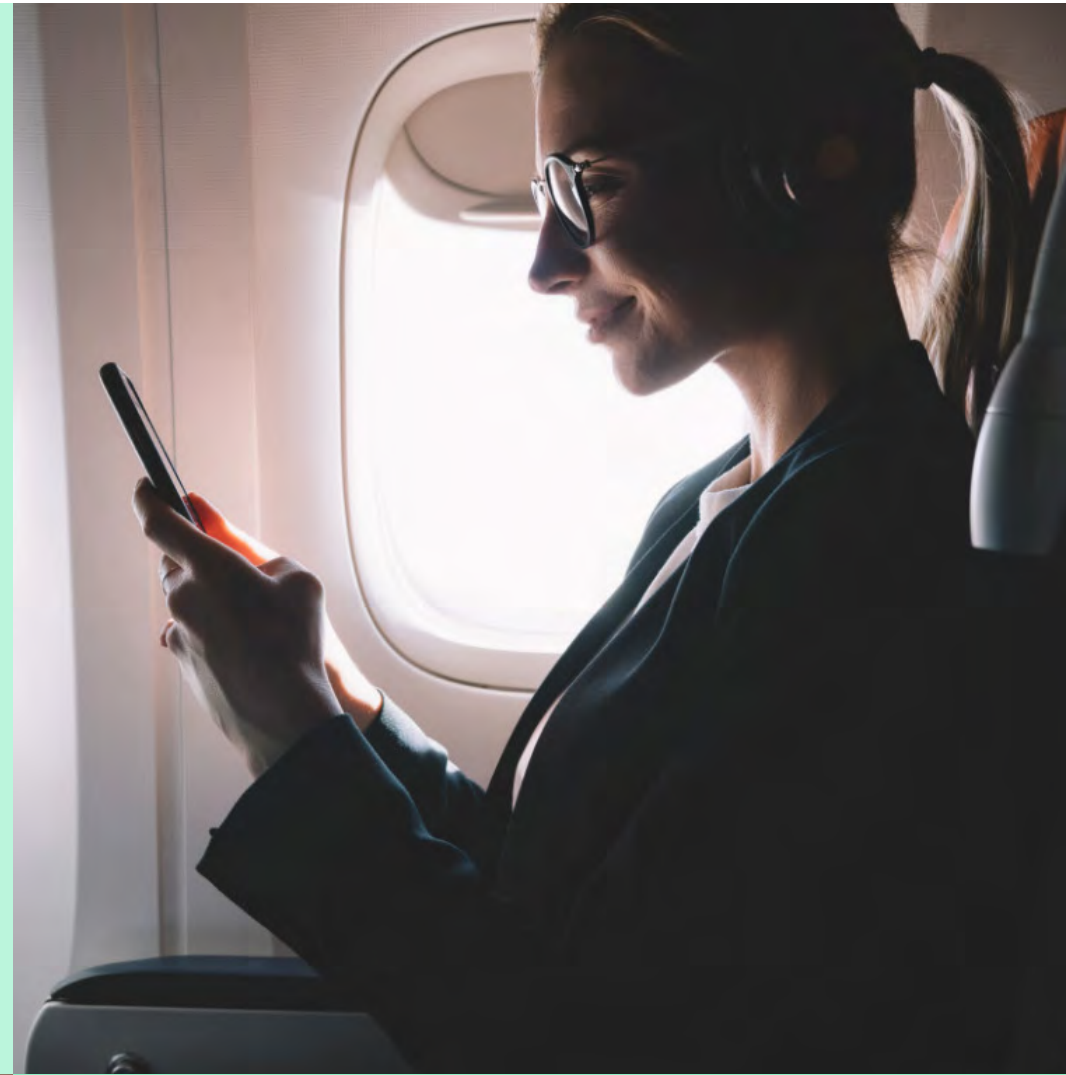

Digitises controls, automates reporting, collects and manages incidents, and provides insight into key metrics and trends with built-in BI tools.

All in one app!

create.

Define the layout and structure, add multiple types of responses, and identify main questions as incidents.

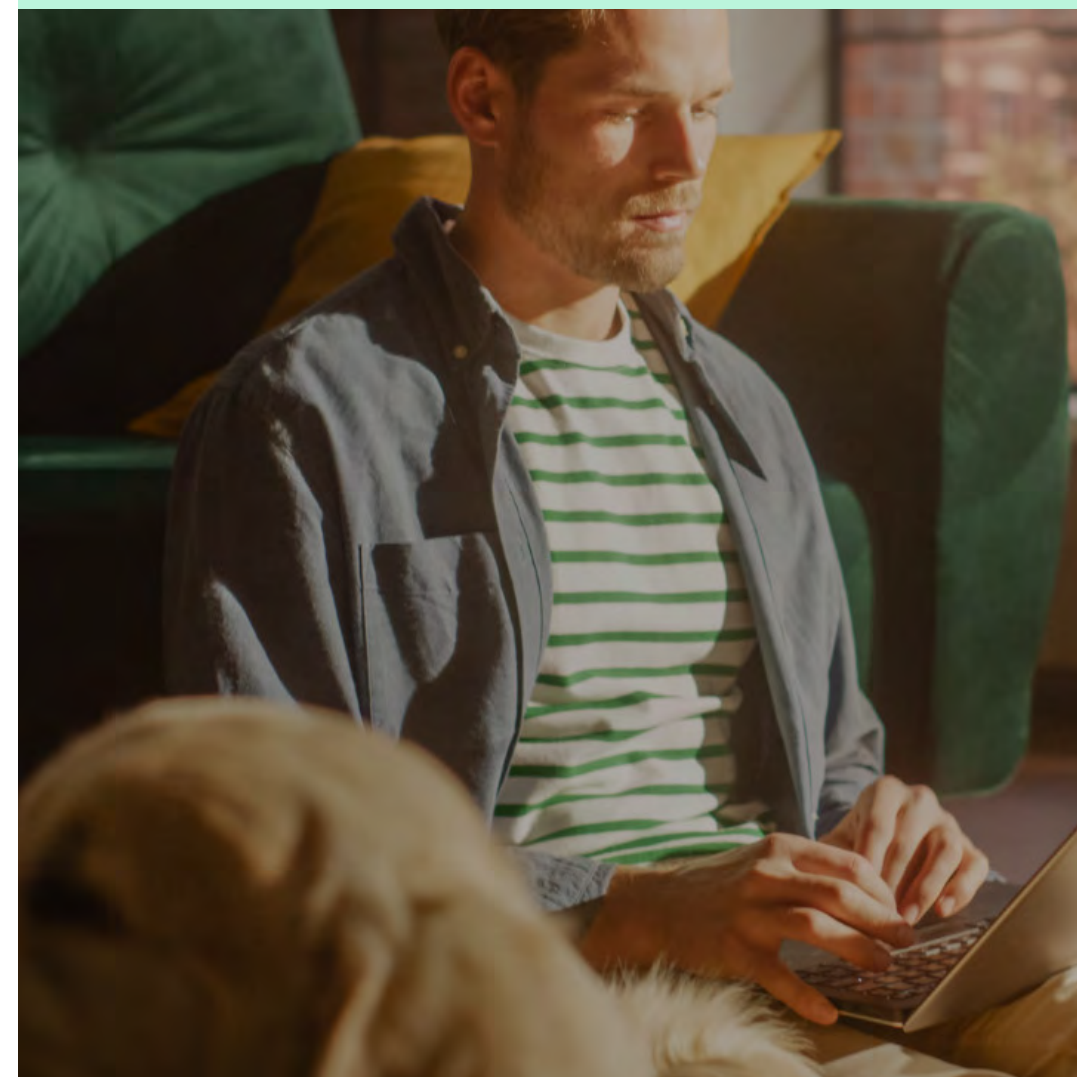

check.

Perform digital inspections on any device. Add photos and comments at any time.

manage.

Create locations and assign users. Configure permissions and privacy policy. Build an inspection schedule.

analyse.

Analyse your data using AI to create personalised statistics and reports.

Introducing Checly Score

**The ultimate control processes solution
that puts your needs in charge!**

Our advanced scoring system, powered by our own algorithm, allows you to set weights easily, mark incidents, and reverse scores to customize your control processes exactly how you want.

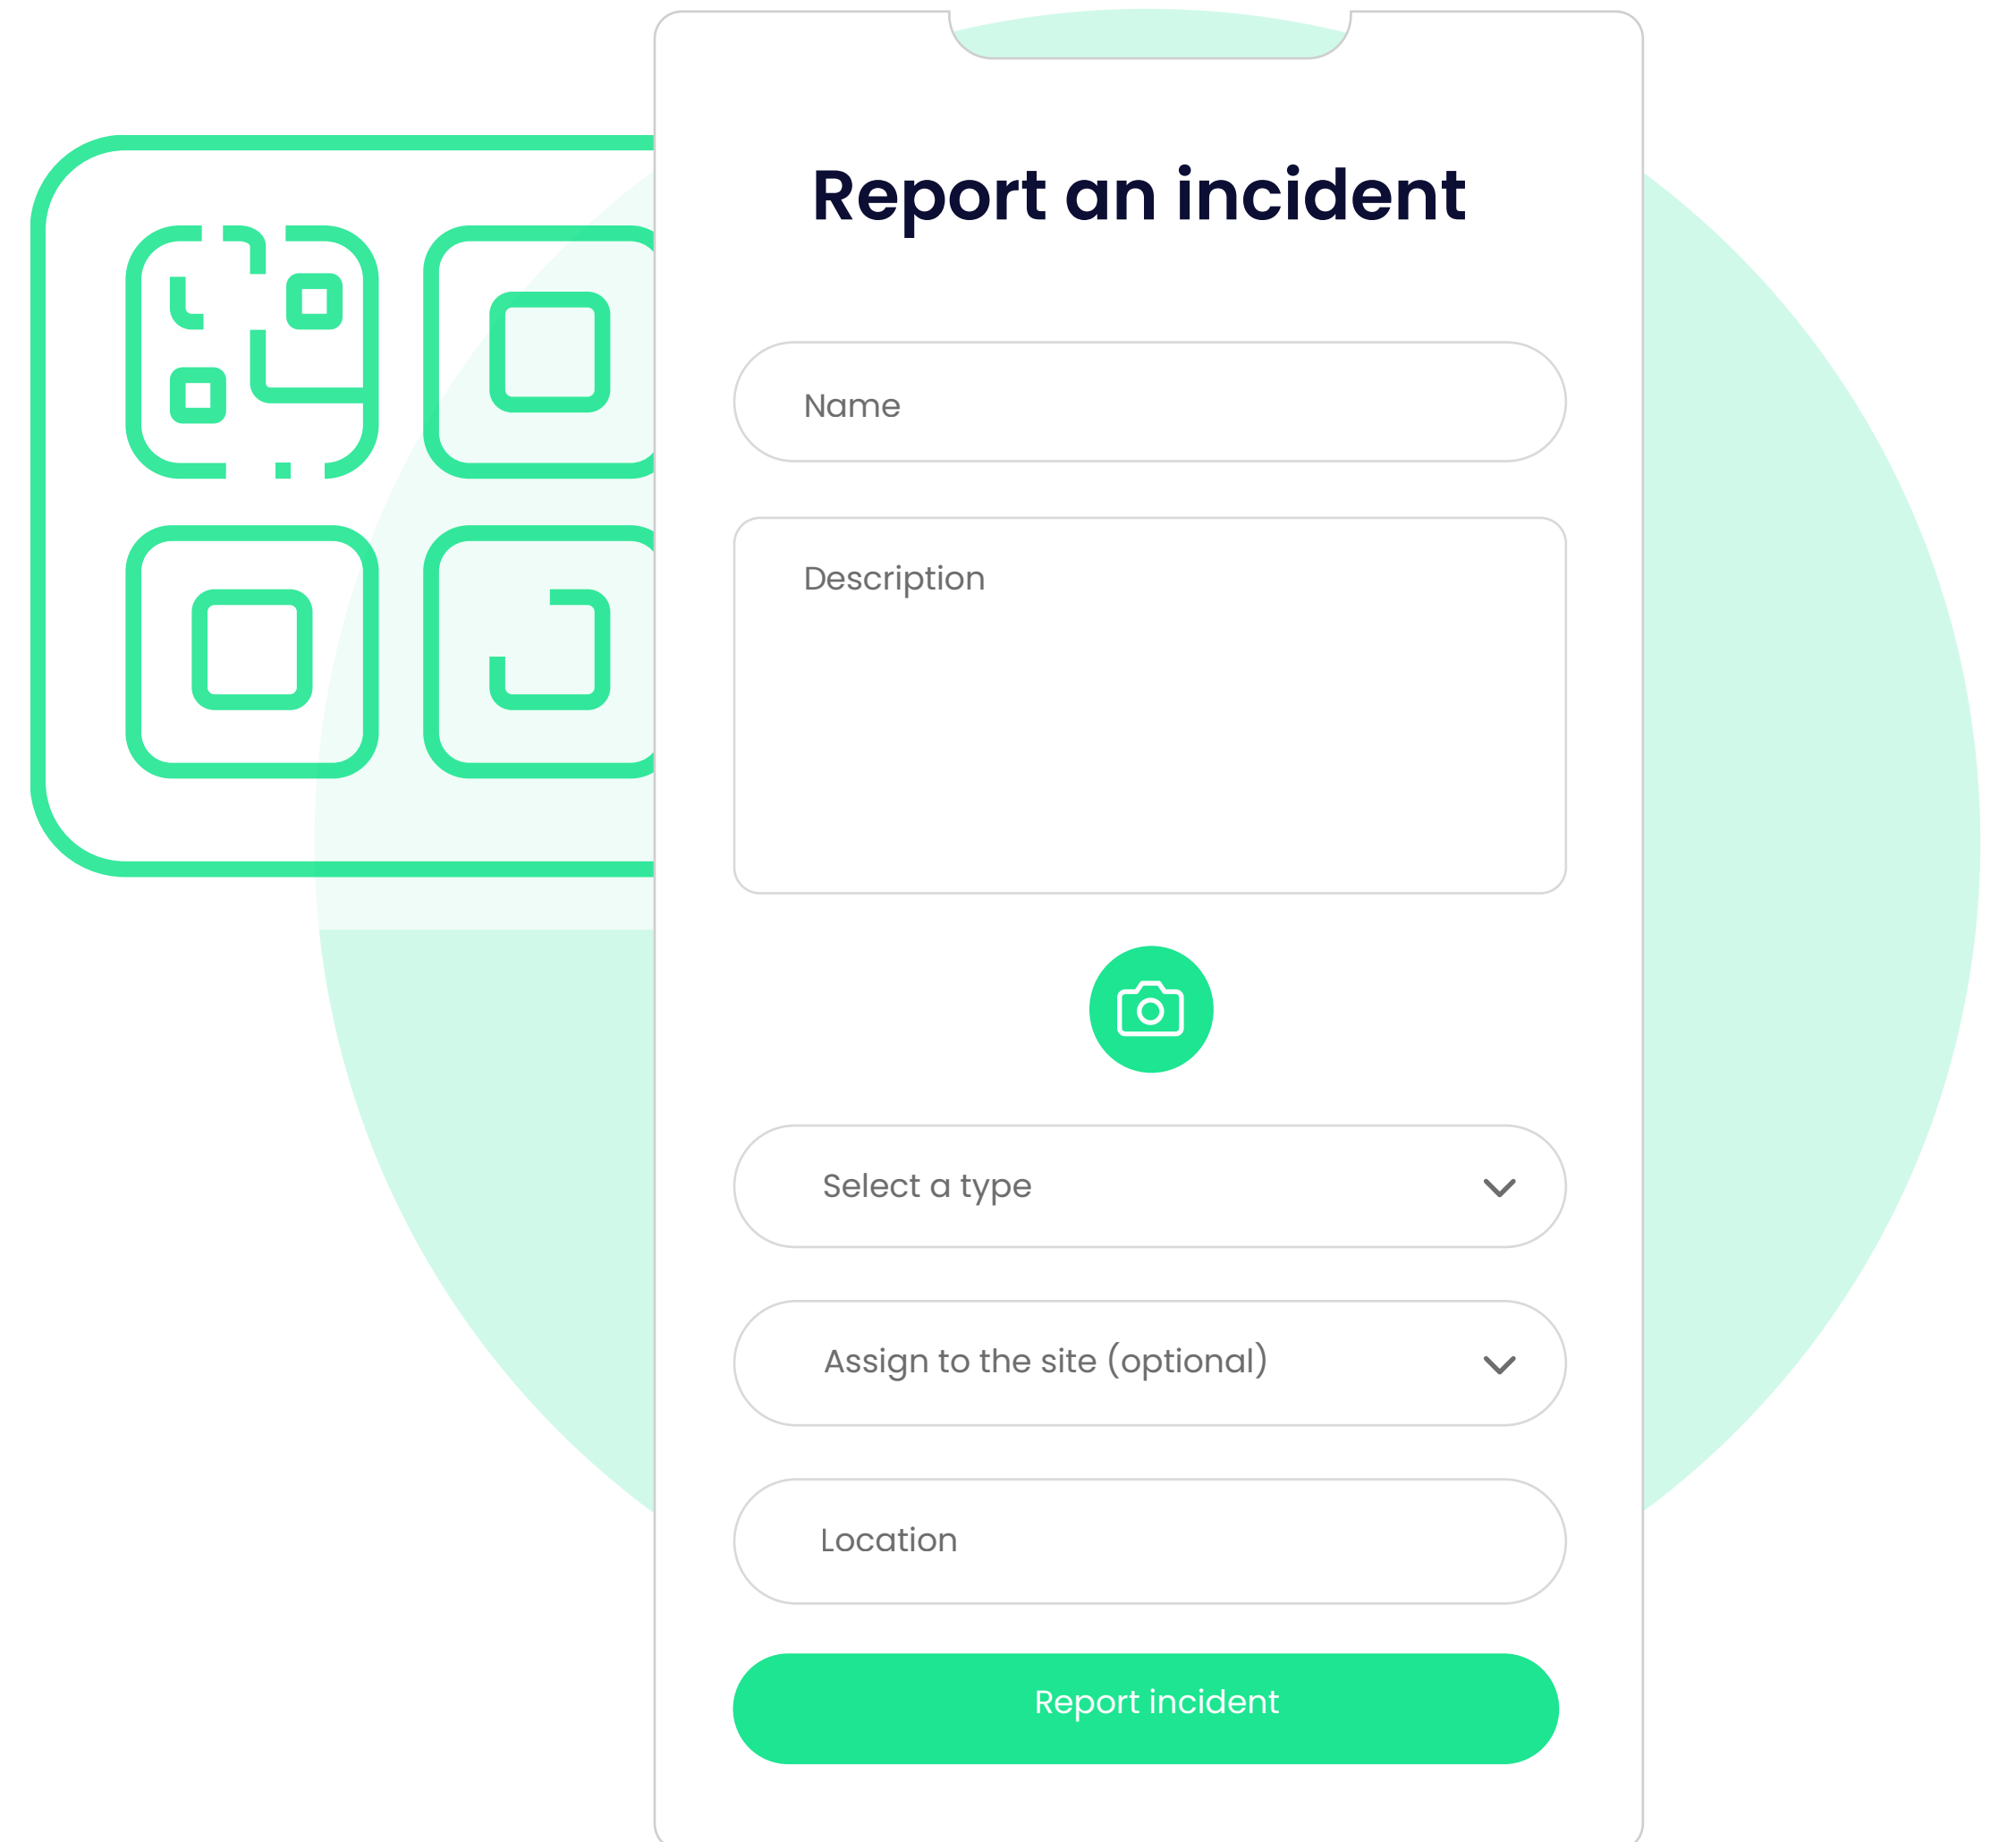

Checly Score gives you the power to take control of your inspections like never before.

Rapid reporting of incidents

Provide your employees, clients, and anyone with the possibility to report incidents with just a click.

They can use a dedicated mobile app or landing page, scan the QR code, or open the form to report unexpected events in a specific location.

Report an incident
