TONALITY®
NATURAL FACADES

Naturally COLOR.
Colors for eternity.

NATURE. COLOR.

Turn to the colors.

TONALITY takes nature as its model. Choose from over
50 standard colors and designs. And if your desired one is missing
from this wide range, almost any shade can be realized as a special
development on demand. Permanent color und UV-resistance,
however, remain standard, logically.

WESTERWALD
Naturally Clay
MADE IN GERMANY

ARCHITECT | DI Lothar Huber Architects, Lustenau, AT
OBJECT | Pertinsel children's house, Fussach, AT
PRODUCT | TONALITY® Facades
COLOR | Cream, Pearl grey, Special color
SURFACE | smooth
PHOTOGRAPHY | Günter Laznia, Bregenz, AT

With our MCS process
# to a unique product quality.

MCS process
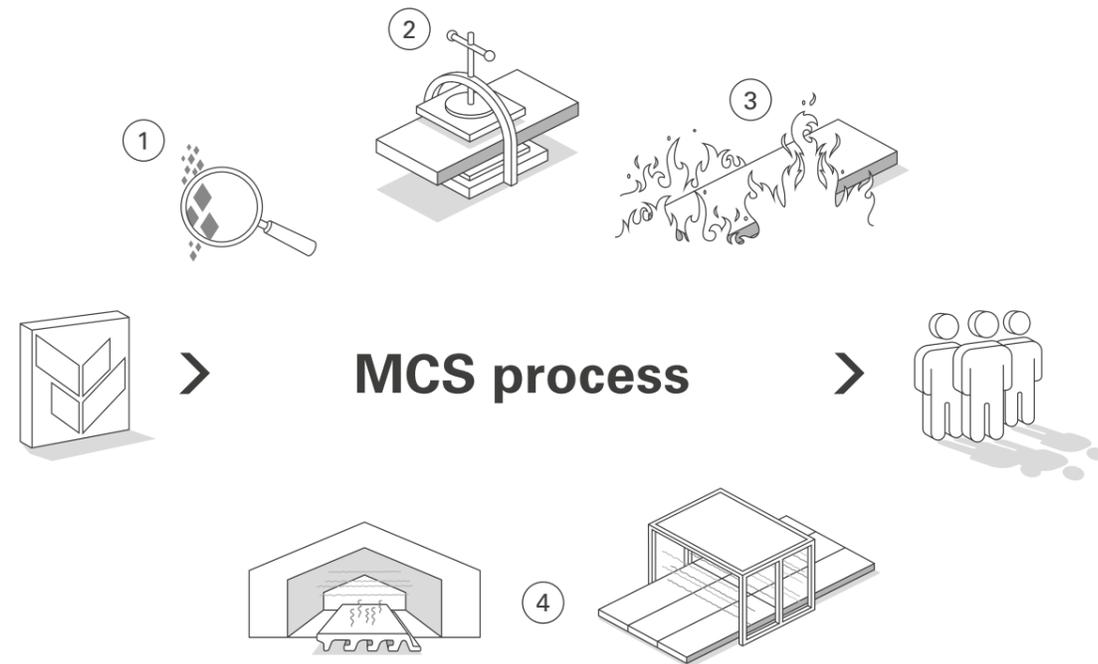

1 MICRO-PROCESSING THE CLAY

Our work begins in the very fine: The first step consists of grinding the clay to a grain size of 64 micrometers (0.064 millimetres). The fireclay used is also ground up until it is ultra-fine. Both raw materials are then placed in the press.

2 WORK AT HIGH PRESSURE

With the aid of our vacuum extrusion process, the desired ceramic element is pressed at high pressure. The fine processing of the clay and fireclay in combination with a high press pressure guarantees a high level of solidity.

3 SINTERING – NOW THINGS REALLY HEAT UP

Thanks to maximum temperatures of up to 1,200°C, the ceramic elements can be fired until sintering takes place. The material, which has already been heavily compressed, is compacted even further. All raw materials are fused together.

4 HOMOGENEOUS DRYING & HOT GLAZING PROCESS

The final step involves cooling, drying and glazing of the ceramic elements. Specially designed roller dryers ensure homogeneous drying. The traditional, digitally controlled hot glazing process gives the final product the desired surface.
