

The Polish Mining Chamber of Industry and Commerce

Industrial tradition, the future of energy!

For over 35 years, the Polish Mining Chamber of Industry and Commerce has represented the interests of entrepreneurs and employers in the mining sector, mining-related industries, service companies, science and research institutions. We support the development of our members, protect their interests, promote them both domestically and internationally, and build a strong image for Polish industry.

Furthermore, as the Green Technologies, Innovations, and Power Security Hub (GIPH), we support member companies and institutions in the processes of diversification, energy transition and the implementation of modern technological solutions.

Members of the Chamber

Polish Mining Chamber of Industry and Commerce represents the interests of the Polish mining sector:

Mineral Resource Producers

Service companies

Scientific and research institutions

Manufacturers of mining machinery and equipment

Universities

Strategic objects

To represent, support and protect the interests of mining and mining-related companies and institutions during the transformation of the fuel and energy sector.
